

TRIANGLE MEETING PART TWO

@ ROXY Birsfelden {CH} . september 9 to 12, 2021

We will pick up threads from the online meeting in March 2021 and continue to weave a carpet on which artistic exchange and collaboration in the Tri-border region can take place. Triangle Meeting Part Two focuses on getting to know each other in person, on exchanging, dreaming, putting plans into action and last but not least: dancing together.

The platform is organized by dancers and choreographers Johanna Heusser and Zina Vaessen and carried out by Tanzbüro Basel, in co-production with ROXY Birsfelden and tanznetz|freiburg as well as in collaboration with Pole-Sud CDCN, Strasbourg.

Physical lab

In this lab we will dive into a creative process together and get to know each other through movement. The lab will be led by the dancer and choreographer Rebecca Weingartner. We will present the results of the process in an informal public sharing & exchange on Sunday. This is open to people who are working in the field of dance & performance art and are interested to exchange with the participants.

Friday, Saturday Afternoon 2.30 - 6 p.m

Collective vision labs

The two afternoons are open to be filled by the participants' interests and ideas for enabling more exchange in the tri-border Region. We will take time to share, discuss and maybe even put into action, ideas which bubble up in the moment as well as ones which have been in the cooking pot for a long time. The afternoons will be facilitated and moderated by the participants as well as the organizers. They will be structured on the spot as we divide into subgroups based on people's interests.

Friday and Saturday Evening 8 - 10 p.m

Work in progress sharings

The sharings give the participants the opportunity to present work which is still in process and receive feedback from other participants. After sharing material of maximum 20 Minutes, a guided feedback round will follow. Please apply for the work in progress sharing through labormanifest12@gmail.com latest by the 1st of September.
